User Request Form

Date 7/7/2020

From:

Zaid Reshiq

To:

Suzan Ahmad

User Request Type:

Enhancement

Title:

Internship Application Form Enhancement.

Description:

We are facing a problem with the way of how the application form is manually sent by email in a text file where the process of collecting and managing the information is hard to filter, in which it takes more time and effort. In addition, while going through the reviews, we came to know that the applicants find it difficult to fill out the application by sending their CV to the company's email and then after receiving the application they fill it out and send it back again.

We request you to find a solution for the mentioned problem.
