Best offer

Cost per point	Total points	Cost/5 years	Company
655.17	116	76,000	8
773.91	115	89,000	19

Most suitable Offer

According to the comparison done in the previous table and taking the most important criteria in to consideration, the offer done by company (8) has lower cost per point and a good point average of 116

Therefore, company 8's offer is accepted.

Process design:

Depending on the system we are working on and the different types of processing we took, we found that Real time processing is the most suitable process for our system.

This type of processing is characterized by the tight interaction of the system with the user, and according to the database it is always up to date. These features are the most important features of the HR department regarding internship programs since the HR system provides an all time availability to the applications forms and the applicants are able to send their documents at any time.

According to the database this process helps make it become in its latest updated state, which improves the selectivity of the applicants using the HR analysis.

Depending on the HW and SW ability of the company, this process can be easily applied, since it is an IT firm, using their most developed and branded HW and SW.
